Education

Konya Food and Agriculture University **Konya, Turkey**
Bachelor of Science in Computer Engineering; GPA: 3.14 / 4.00 *Sep. 2021 – July 2026 (Expected)*

- **Relevant Coursework:** Data Structures, Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems.

Experience

University of Groningen **Groningen, Netherlands**
Research Intern *Sep. 2025 – Nov. 2025*

- Implemented an **SDN-based Load Balancer** to optimize network traffic flows and reduce latency using **Python**.
- Conducted **failover testing** to ensure fault tolerance in large-scale data traffic distributions.

Konya Şeker Sanayi ve Ticaret A.Ş. **Konya, Turkey**
SAP Intern *Jun. 2025 – Jul. 2025*

- Analyzed business workflows across **SAP FI, CO, and MM modules** to improve process visibility.
- Identified system bottlenecks and authored technical documentation to standardize SAP procedures.

Atiker Yazılım **Konya, Turkey**
Mobile Developer Intern *Jul. 2024 – Aug. 2024*

- Designed and deployed a full-stack mobile application from scratch within the **Clomosy** system.
- Developed components using **TRObject** and managed local data storage with **SQLite**.

Projects

BBuddy: Student Budget App | *Flutter, Hive (NoSQL), Provider, MVVM* **Nov. 2025 – Dec. 2025**

- Developed an **offline-first** budget management app using **MVVM architecture** and **Hive** for high-performance local data persistence.
- Utilized **Provider** for state management and integrated **fl_chart** to visualize spending habits with interactive analytics.
- Designed a modern user interface following **Material 3** standards with dynamic theme support.

Kelime Savaşı: Multiplayer Game | *Dart Frog, WebSockets, Riverpod, SQLite* **Jan. 2026 – Present**

- Architecting a **server-authoritative** multiplayer game using **Dart Frog** and **WebSockets** for real-time synchronization.
- Implemented a typo-tolerant validation system via the **Levenshtein Distance algorithm** and managed global state using **Riverpod**.
- Integrated **SQLite** for local dictionary management to optimize performance and reduce server-side overhead.

Technical Skills

Mobile Development: Flutter, Dart, Java, MVVM, Clean Architecture, State Management (Provider, Riverpod), RESTful API, WebSockets, Material 3 Design
Backend & Database: Dart Frog, Python (FastAPI/Flask), CRUD Operations, PostgreSQL, Hive (NoSQL), SQLite (Relational)
Languages: Dart, Python, Java, JavaScript, SQL, TRObject
Tools & Workflow: Git/GitHub, Docker, Android Studio, VS Code, Firebase
Specialized Systems: SDN (Software Defined Networking), SAP, Linux

Languages

Turkish: Native
English: Full Professional Proficiency
Dutch: Elementary (A1/A2)
